

InterLAN Internet Exchange

update

Who are we?

- InterLAN Internet Exchange is a private company owned by Interlan Association (Asociația Interlan)
- Interlan Association is a not for profit organisation of Internet Service Providers in Romania founded in 2005, currently having 43 members
- Members of the Association are Romanian ISPs only
- InterLAN-IX is the main project of the Association, along with other projects intended to support the activity of its members
- The name InterLAN comes from “Interconnecting Local Area Networks”

InterLAN Internet Exchange

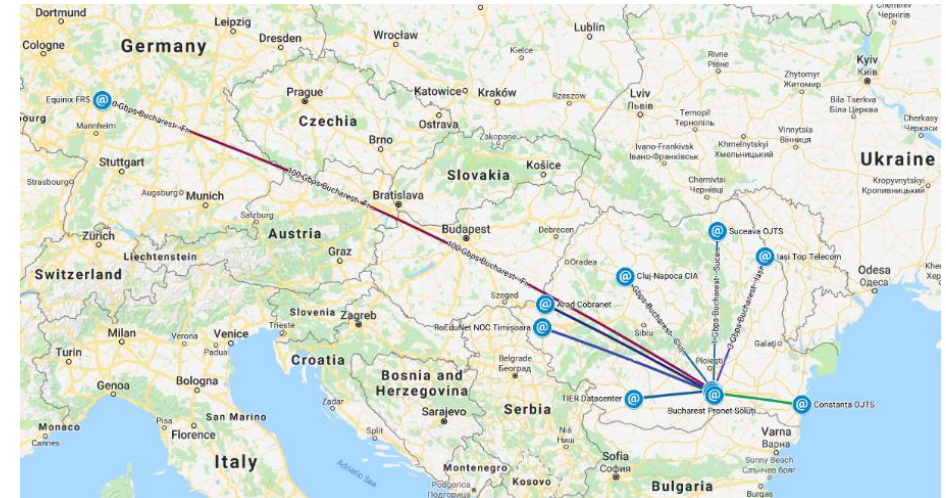

- 130 ASNs from Romania as well as from the region and worldwide connected
- 15 locations: 7 in Bucharest, 7 in major cities representing regions of Romania and 1 in Frankfurt, Germany
- Multicast Exchange Platform TVX
- 5 DNS Root anycast instances: D, E, F, K, L
- AS112 service
- RIPE NCC RIS Remote Route Collector (RRC22) & AuthDNS in deployment
- IXP Manager peering tool

National & regional infrastructure

168 ports in 15 POPs:

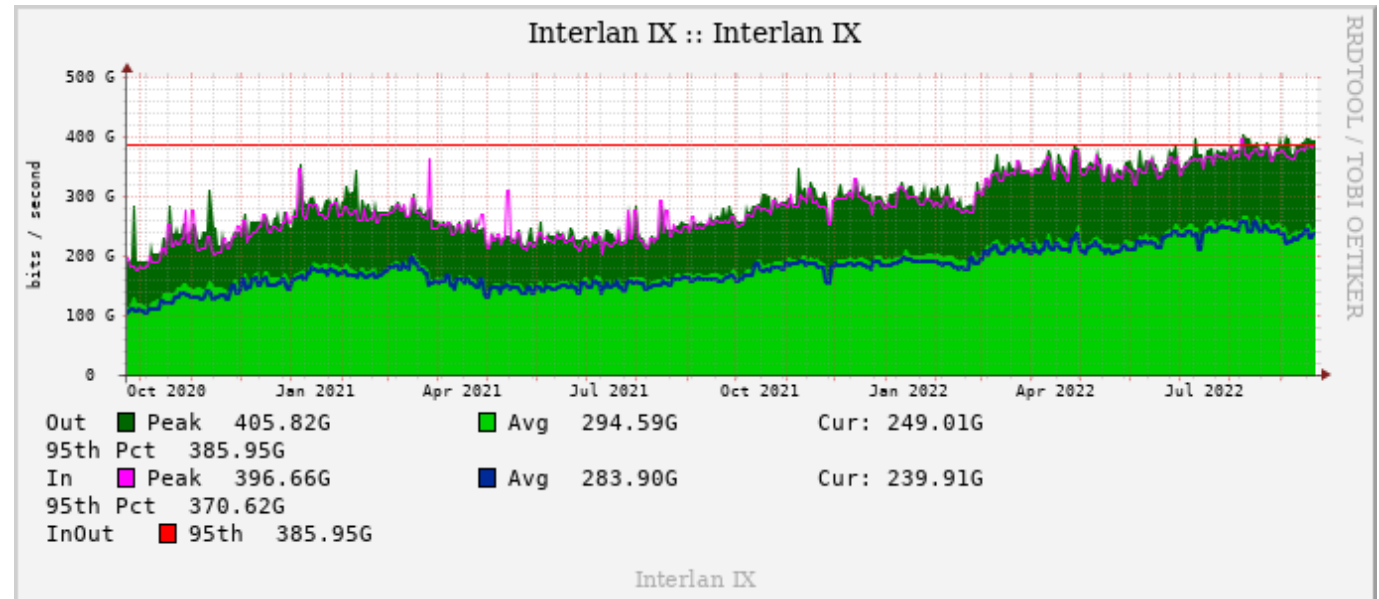

- 7 POPs in Bucharest over 40G ring (NXDATA-1, NXDATA-2, Voxility, M247, Teletrans, Radiocom, Ines Group)
- 7 POPs over 10G links in Arad, Cluj-Napoca, Constanța, Craiova, Iași, Suceava, Timișoara
- 1 POP over 200G link in Frankfurt Equinix FR5

Connected capacity

Ports:

- 6 ports x 100M
- 36 ports x 1G
- 111 ports x 10G
- 2 ports x 40G
- 13 ports x 100G

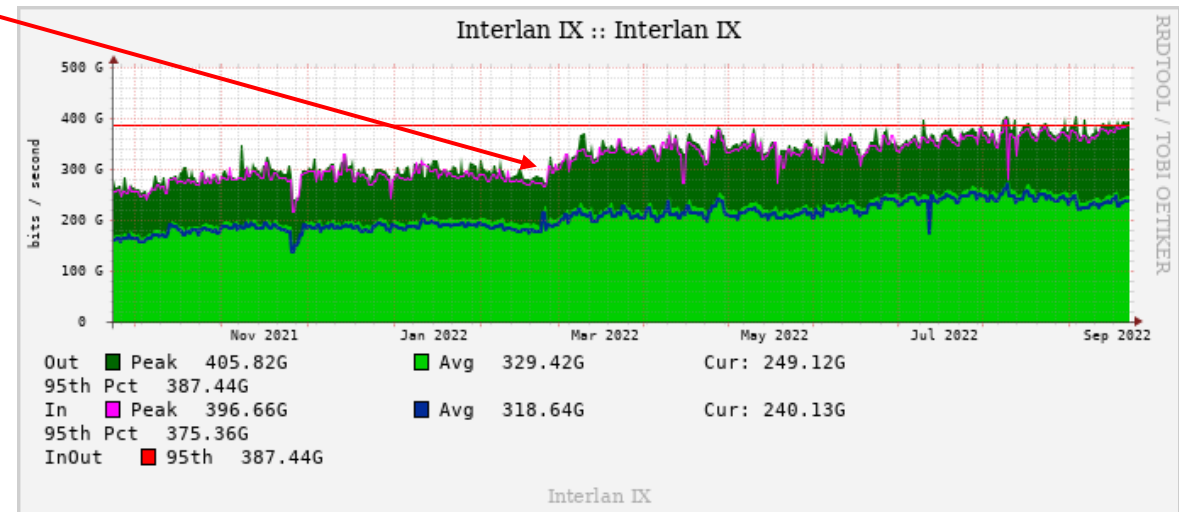

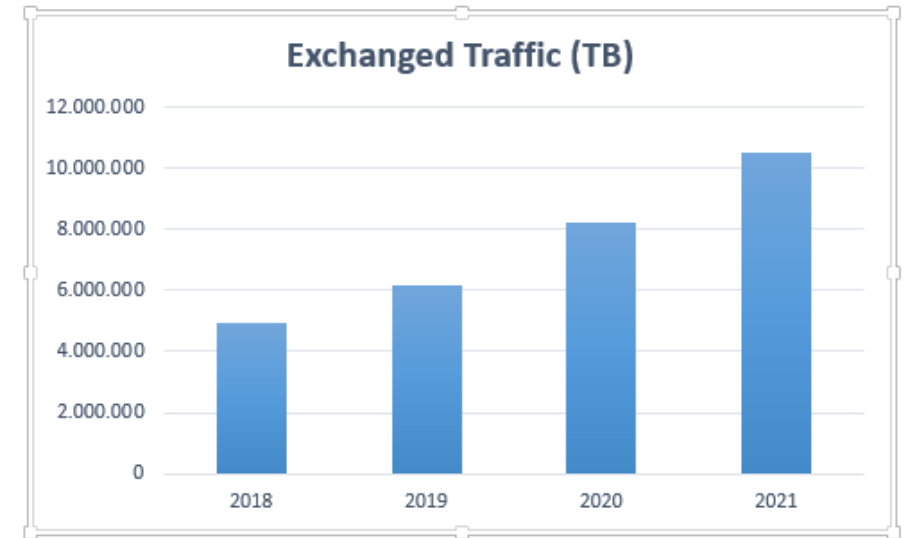

Total connected capacity: 2,527T

99% of customers are using route-servers

99% of customers are IPv6 enabled

Exchanged Traffic

- Today's daily peak traffic: 400 Gbps
- Total exchanged traffic in 2021: over 10 million Terabytes
- Massive increase of traffic with Republic of Moldova and Ukraine since March 2022

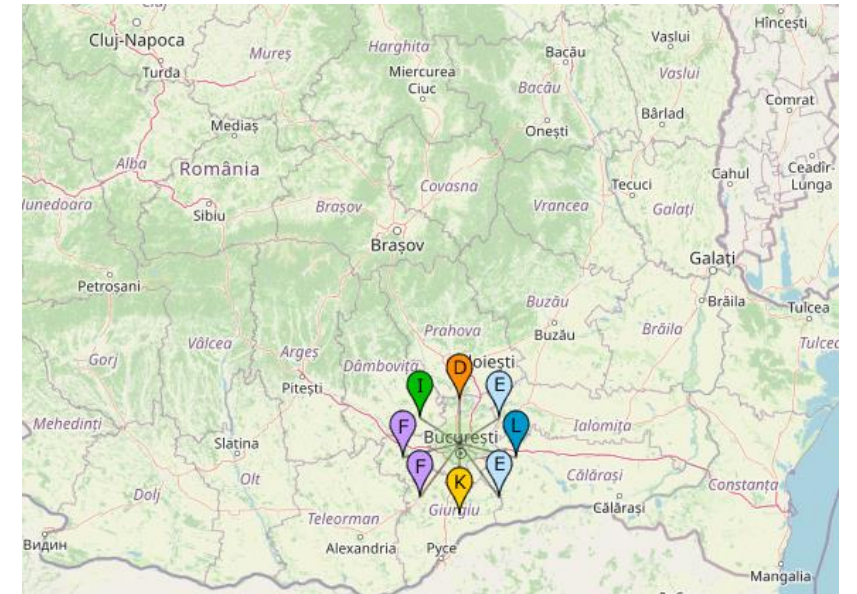

DNS Root Servers

As of 27 September 2022, the root server system consists of 1551 instances operated by the 12 independent root server operators.

All 8 DNS Root Anycast Servers in Romania are hosted in Bucharest.

5 out of 8 DNS Root Anycast Servers in Bucharest are hosted by InterLAN:

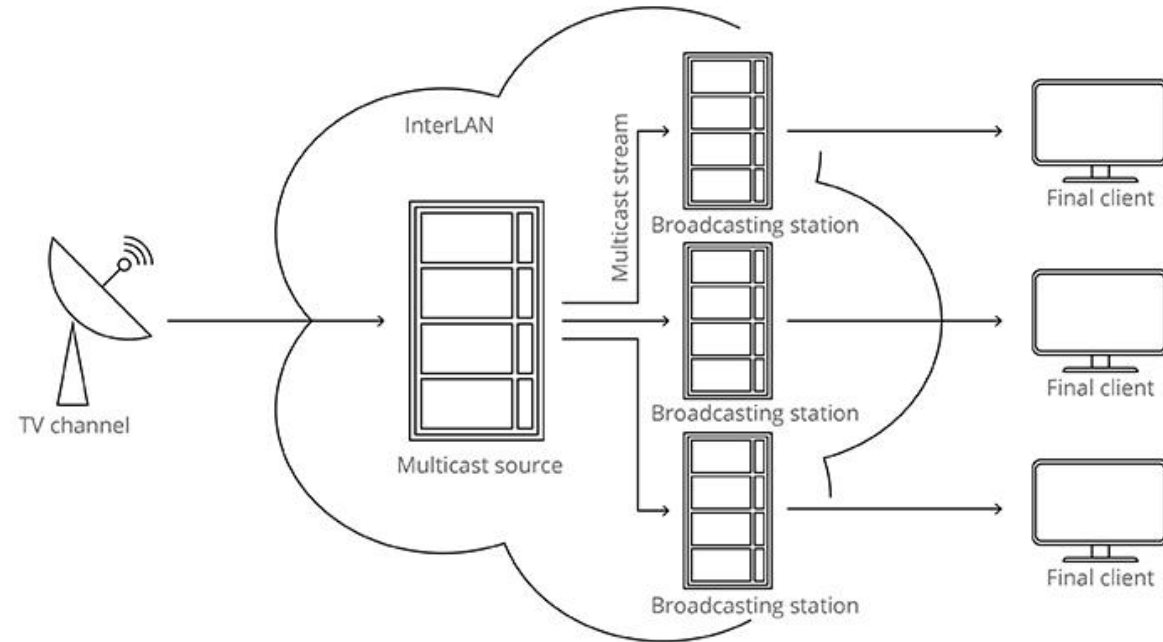

- D-Root (University of Maryland)
- E-Root (NASA Ames Research Center)
- F-Root (Internet Systems Consortium)
- K-Root (RIPE NCC)
- L-Root (ICANN)

TV Exchange Media Platform

- 154 streams
- 106 TV channels
- Multicast MPTS/SPTS and unicast
- Stream management app in development

IXP Manager

- InterLAN-IX uses IXP Manager, a management system for Internet Exchanges
- Includes administration and customer portal
- Provides end to end provisioning
- Allows IXPs to manage new customers, provision new connections and services and monitor traffic usage.
- Released by INEX under an open source license
- 184 IXPs worldwide are using IXP Manager
- InterLAN-IX is a Silver Sponsor of this project since January 2018

PeeringDB

Nivelul serviciului	Asistență 24/7

Supporting PeeringDB:

- InterLAN is a Silver Sponsor of this project since January 2020
- Romanian language interface translation done by 100%.

What we did in 2022

- Increasing number of ASNs and ports
- Increasing number of CDNs as well as TV Channels
- Migration to Arista Networks switches
- Link from Bucharest to Frankfurt upgraded to 200G
- Partnership Agreement with DE-CIX, enabling Romanian Networks and Enterprises to access the world's largest neutral interconnection ecosystem
- Supporting Ukraine by waiving the port fee for Ukrainian telecom operator UTG
